

The Design Centre

Short on people to run your design and setout jobs?

4 Views can solve this problem.

4 Views's Design Centre is for shopfitters, kitchen cabinet makers, joiners, architects and designers. We work with you to extend your setout and design capabilities. From machine code through to photo realistic 3D images, we create your plans, working drawings, libraries and cutting lists.

There are many benefits of outsourcing your design and setout capabilities.

- Supplement your set out workload when you need to - you don't have to turn down jobs or miss deadlines.
- Purchasing additional software not an option?... Maintain your running costs as well as accessing the latest in drawing software by using The Design Centre.
- Help your customers to "see" their designs prior to construction - it will save YOU time.

Take a look at the Set Out and Design pages to see how these services add so much value to your operations.

4 Views' Design Centre is your answer. Call 02 9531 4666 or [Enquire Here](#)
